

Course Descriptions for Single Credit

Fall Semester

Practical Application of High School Math

This course is for high school students needing an additional credit in mathematics. The course is designed for students to apply math fundamentals to real-world situations. Students will be expected to provide realistic data to solve interesting math problems as they relate to local, national and world situations.

Spring Semester

Advanced Topics in Practical Application of High School Math

This course is a for high school students needing an additional credit in mathematics. The course is designed as a continuation for students to apply math fundamentals to real-world situations. Students will be expected to provide realistic data to solve interesting math problems as they relate to local, national and world situations.
